

Calcium carbonate [Limestone]

Feed material

Analytical constituents:

Calcium (Ca)	38 %
Insoluble ash residue in HCl	1,5 %
Moisture content	< 0,5 %

The feed material is dried, crushed/ground and sieved natural calcium carbonate (limestone), which is intended to satisfy animals/birds nutrition needs (need for calcium). This product has no feed additives and it is used to feed animals/birds, either in the natural state or as a component in compound feeds to supplement calcium content in feed.

Product R5 Fraction 0,5 - 1,4 mm Net amount..... kg
 Lot №.
 Date.....

Expiry date: Minimum storage life is 12 months after the date of manufacture if stored properly (because of excessive moisture the product becomes caked).

Manufacturer (Legal address): Nordkalk AS
